

# Covid-19 Membership Pack

These packs are designed to make research projects of a social good nature open to researchers, academic institutions, community groups, governments and other individuals/ collectives working in a non-commercial setting who are looking in some way to respond to the pandemic and to make a difference in the work that they do and services that they provide.

This document outlines what is included in a “pack” and the process you will go through as well as an outline of the financial/ time investment required within a basic membership. It also gives an indication of the cost of any optional add-on’s, although we would always recommend getting in touch with us directly to discuss your individual needs.

Although we have defined these areas of interest, please note that we are keen to collaborate on any funding proposals either to use these packs, or to define new lines of enquiry.

## What is included in a pack?

Below we outline what is included in a “pack” through a basic COVID membership, as well as optional extras. All prices are in USD unless stated otherwise, and do not include applicable taxes.

### 1. Design

- Access to a selection of individual SenseMaker® instrument designs which have been carefully researched and put together by SenseMaker® practitioners on your chosen topic area of interest.
- The hosting and configuration of **up to two** of these designs into an URL collector site and/or an APP, with your own unique project code for you to send out to your proposed research population for a period of up to 6 months.
- Please note that we cannot offer any amendments to the design of these sites within the context of a basic membership. There is an option to edit up to 2 multiple choice question (MCQ) filters outlined below.

(1) Basic membership (access to <b>up to two</b> sites + support) .....	4,000.00
(1) Modifications to up to 2 MCQ's on a single site (optional) .....	+ 200.00
(2) Hosting, configuration and testing of additional language site .....	+ 500.00
(3) Usage of additional sites within the pack (per site) (optional) .....	+ 500.00

### 2. Collection

- Usage for a period of up to 6 months of data collection, capped at up to 500 entries within one chosen cohort population. If you would like to discuss a larger or more complex capture, please feel free to contact us for a quote based on your needs.
  - Although you will be primarily responsible for coordinating a collection outreach strategy, we can help to support you with any ideas to help get some stories through with up to 2 hours of consultancy time.
  - During this time we will explain how you can monitor numbers of entries you have obtained, to support your collection efforts along with data cleaning.
- (4) Additional data collection (per month)..... + 500.00

### 3. Working with the findings

- Access to a basic analyst “workbench” for up to 3 individuals. Included is 1 hour of remote training in how to use this tool to conduct pattern analysis and relevant discussions as well as some ideas around putting analytical insights into action.
- Various levels of reporting can be contracted, starting at the base-level emergent patterns report all the way to comprehensive board-level or donor-fronting report. Alternatively, report writing support can be charged at USD125 per hour.

- (5) Remote training in workshopping techniques (optional) ..... + 1,200.00  
 (6) Emergent patterns report (optional) ..... + 2,800.00  
 (7) Additional consultancy support (per hour) (optional)..... + 125.00

### 3. Access to a community of practice

- Access to an exclusive social space for connecting and engaging with others who are running programs similar to yours for up to 1 year.
- Periodic remote collective sense-making sessions across programs to get insights from beyond your own field and the opportunity to see and be inspired from what others are working on.
- We strongly encourage the sharing of outcomes across members in all COVID packs.
